Western Blotting System LX8000WBS

Email: info@labdex.com **website:** www.labdex.com

Description

Western Blotting System LX8000WBS features a gel transfer area of 175 ×175 mm and uses only 4000 ml of buffer, ensuring efficient protein transfer with minimal liquid. For safety, the system automatically shuts off when the lid is removed. The short distance between the electrodes accelerates the protein transfer process. This versatile system can be used independently or as part of a larger setup in research, diagnostics, and quality control within biotechnology and medicine.

Specifications

Trans size	175 x 175 mm
Total buffer volume	4000 ml
Product dimension (L x W x H)	205 x 170 x 240 mm
Net weight	2.3 Kg
Packing dimension (L x W x H)	360 x 260 x 390 mm
Gross weight	3 Kg

Features

- Easy to transfer the blotting with a cooling device
- Auto switch-off when the lid is moved
- Easy to use

Applications

- This is used to detect specific proteins in a sample with the help of antibodies, commonly used in research, diagnostics and quality control.

Standard Accessories

- Body tank with electrode x 1 Pcs
- Transfer Splint x 2 Pcs
- Fiber pads x 4 Pcs
- Cooling pack x 1 Pcs
- Cooling pipe x 2 Pcs
- Electrical cables x 1 Pcs

71-75 Shelton Street Covent Garden, London WC2H 9JQ UK.
